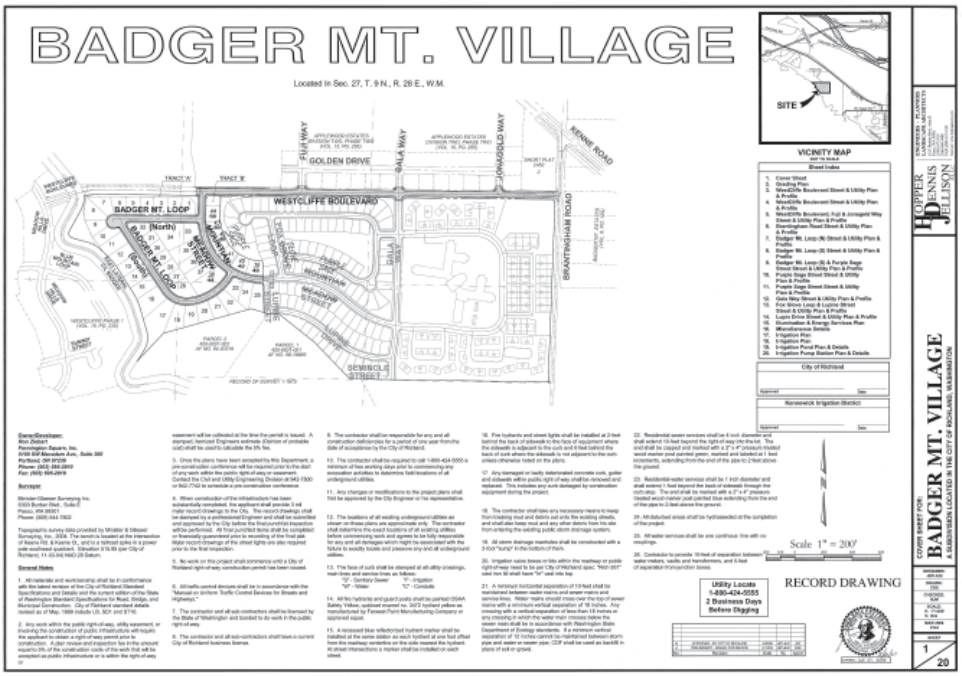
Badger Mountain Village | *Richland, Washington*



Badger Mountain Village is a PUD site located in south Richland consisting of Single Family Residential with future plans for a Senior Living Facility. HDJ's contribution to the project entailed sanitary sewer and water main extension, storm drainage conveyance design, a hydraulic report, and site grading. As well as a master planned irrigation distribution system, in accordance with Kennewick Irrigation District's standards and specifications. The 80 acre site will be supplied from the newly designed irrigation pump station

and 1 acre pond centrally located within the site. HDJ also prepared construction plans and specifications, which required coordination with all reviewing agencies, utility companies and sub-consultants.

Services

- Civil Engineering Design
- Presentations at City Planning Commission Hearings
- Coordination with Utilities Subconsultants
