HDJ provided civil engineering design services required for the development of a branch of Columbia Credit Union at The Crossing on 'C' Street, in Washougal, Washington.

In support of the architect, HDJ provided civil engineering services including; the design of the connection to public sanitary sewer system, the design of the connection to the potable water system, design of the pedestrian and vehicle access to the building, the design of the on-site

site grading. The project obtained LEED Gold status. To aid in this, HDJ designed pervious concrete paving adjacent to the building to be used for stormwater quality treatment and retention/infiltration.

This project recently was honored in 2008 with a "Community Pride Design Award" by Clark County.

pavement striping, design of the frontage improvements to 'C' Street, and the entire
