

Columbia Waterfront

Vancouver,
Washington

The master plan creates a vision and a framework for a complete mixed-use development that will fully realize the site's potential. The urban design maximizes views of the river and creates a waterfront amenity for people who live in the development, as well as those who visit to shop and work. The pedestrian realm was carefully considered to create a human-scaled walking environment with active uses at the ground floor. Roads have a

gentle arc that creates a sinuous rhythm and sense of discovery as you move through the development. When completed, the project will add significant activity to downtown, with 24 buildings that include a variety of residential types, commercial office, retail and hotels, as well as several landscaped parks of different sizes and scales.
